

**CUBICLE SYSTEMS**  
FOR THE DIVISION OF SPACES

M A D E  
I N I T A L Y

**pba cubicles system** allows for space design to be flexible and modular in every type of public setting, achieved in 3 steps.

## 1 P-VOT System

Choose the new concealed-mount Pivot Hinge to eliminate the aesthetic arrogance of traditional butt hinges.

## 2 500-SS Components

Combine components and accessories for the creation of bathrooms and dressing rooms partitions.

## 3 Hardware Collections

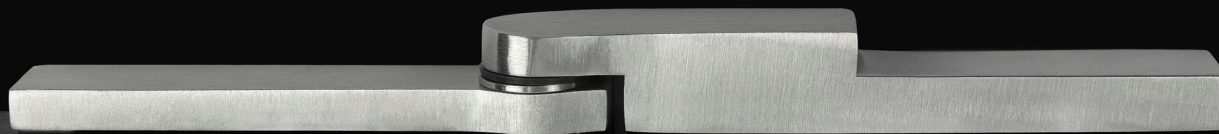

Select pulls, knobs, thumb turns, door stops, and hooks for visual integration across your entire project.

# P-VOT

## The Hidden Strength

**Form and Material  
Follow Function**

Sculpted from AISI 316L stainless steel, with a fluid, precise motion and a wealth of finish options, P-VOT brings enduring elegance to cabins and partitions in high-traffic spaces.

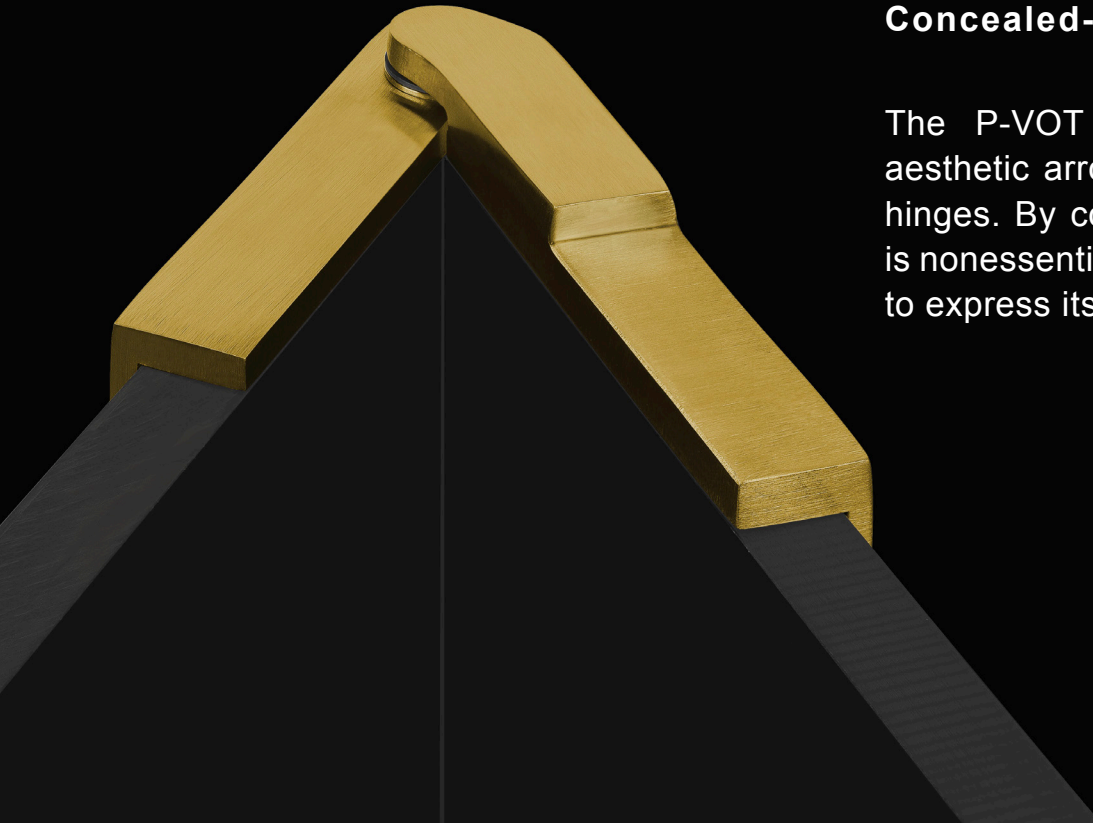

# **P-VOT**

## **Educated Beauty**

### **Concealed-mount Pivot Hinge**

The P-VOT system eliminates the aesthetic arrogance of traditional butt hinges. By concealing everything that is nonessential, P-VOT allows the door to express its pure form.

**P-VOT**

**Strength with Elegance**

**Open – Close**

## 500-SS

### The Functional Design

**Technical properties, combined with the best quality of steel**

The line shows how an elegant and well-coordinated design elevates the appearance and performance of spaces, while guaranteeing maximum convenience for cleaning.

**500-SS**

## **The Modular System**

**Hygiene together with beauty  
and resistance to corrosion**

Modular design allows for installation solutions to meet every type of request from the designer as well as to adapt the product on site during assembly and to overcome problems due to possible errors in measurements or occasional design changes.

## 2CC - 5CS Hardware Collections

### The Comprehensive Range

The collection offers various options to suit different interior environments and stylistic preferences. Related in design and finish options, hardware accessories allow designers to access everything they need from one source, creating a more unified and better integrated look within spaces.

> Discover pulls and door accessories

## 2CC - YOD Hardware Collections

**Strong as Steel,  
Warm as Wood**

This hardware collection has been designed to combine the strength and durability of steel with the natural warmth and comfort of wood to the touch. Featuring clean, contemporary lines enriched by the soft tones of wood, these door accessories are created to complement refined wellness interiors with both elegance and functionality.

> Discover pulls and door accessories

## GOH Hardware Collections

**The beautiful,  
Minimal Design**

The collection is the perfect synthesis of functionality and sculptural elegance, proving, once again, that high-utility products do not have to undermine the visual integrity of a space.

# TOCCO

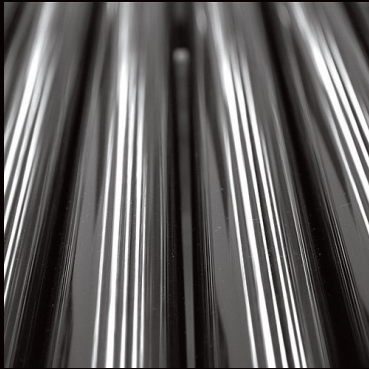

## Hardware Collections

### Sustainable and modular

TOCCO is a capsule collection of sustainable and modular handles and pull handles with interchangeable sensory elements, available in various shapes, an almost infinite choice of colors, and two surface finishes - smooth and faceted. TOCCO supports sustainability: the pull handles in the collection are made from ECONYL®, a regenerated nylon derived from waste materials.

## PBA PRODUCTS CONTRIBUTE TOWARD SATISFYING PREREQUISITES AND CREDITS UNDER LEED

LEED® (Leadership in Energy Environmental Design) is a voluntary certification system for the management, design and construction of buildings that are sustainable from a social, environmental and economic point of view and in terms of the wellbeing of the users. Established in the United States in 1993 by the U.S. Green Building Council (USGBC), LEED is now the most widespread building sustainability certification standard in the world. It considers every field that involves the design and management of buildings or neighbourhoods, both commercial and residential new or undergoing requalification.

## DECLARE LABEL

pba stainless steel pulls offer a [Declare Label Red List Free](#). The Declare Label is like a nutrition label for the building industry. It is a product transparency disclosure that lists the ingredients in products to help customers ensure healthier indoor living environments. It discloses where a product comes from, the materials it is made from, and its end-of-life pathway. The International Living Future Institute hosts a transparency platform and product database featuring Declare that helps stakeholders in the building industry find products free from hazardous substances. The Declare Label has been approved as a compliance pathway for the green building certification system LEED v4. Declare labels that achieve a declaration status of "Red List Free" fulfill the credit disclosure requirements. The Red List contains the worst in class materials prevalent in the building industry, which pollute the environment, bio-accumulate to toxic levels in the food chain, and/or are harmful to construction and factory workers.

## ENVIRONMENTAL PRODUCT DECLARATION (EPD)

pba products have the [Environmental Product Declaration \(EPD\)](#). An EPD is an ISO Environmental Declaration based on ISO 14025 and ISO 21930 standards, that transparently reports the environmental performance of products or services from a lifecycle perspective. The preparation of an EPD includes different stages, from acquiring raw materials to the end of life of the final product. EPDs are based on international standards and consider the entire value chain. Additionally, EPD is a third-party verified document.
